Trade Status	Closed
Entry Price	\$1.5280
Current / Exit Price	\$1.5296

Profit / Loss	Profit
Profit / Loss Amount	+0.15INR
Was the Original Trading Plan Followed?	No — the long position was opened near the recent high of a sharp bullish candle (around 1. 5280) and quickly closed after a minimal move of +0. 0016 USD before establishing clear structural confirmation or reaching a defined target.
Reason for Profit / Loss	The trade was closed slightly above the average entry price (\$1.5296 vs \$1.5280), generating a small profit of 0.15 INR.
Key Learning	Taking small profits without sticking to predefined stop-loss and take-profit targets can encourage emotional execution. Ensure every entry is backed by a full multi-factor checklist (trend alignment, support/resistance levels, moving average confluence) and allowed to run according to a proper risk-to-reward ratio.
